

# VI-HPS

## Hands-on: Live-DVD and NPB-MZ-MPI / BT

VI-HPS Team

- The NAS Parallel Benchmark suite (MPI+OpenMP version)
  - Available from  
<http://www.nas.nasa.gov/Software/NPB>
  - 3 benchmarks in Fortran77
  - Configurable for various sizes & classes
- Move into the NPB3.3-MZ-MPI root directory

```
% cd Tutorial; ls
bin/      common/  jobscript/  Makefile  README.install  SP-MZ/
BT-MZ/    config/  LU-MZ/      README    README.tutorial  sys/
```

- Subdirectories contain source code for each benchmark
  - plus additional configuration and common code
- The provided distribution has already been configured for the tutorial, such that it's ready to “make” one or more of the benchmarks and install them into a (tool-specific) “bin” subdirectory

- Type “make” for instructions

```
% make
=====
=      NAS PARALLEL BENCHMARKS 3.3      =
=      MPI+OpenMP Multi-Zone Versions    =
=      F77                                =
=====

To make a NAS multi-zone benchmark type

    make <benchmark-name> CLASS=<class> NPROCS=<nprocs>

where <benchmark-name> is "bt-mz", "lu-mz", or "sp-mz"
     <class>           is "S", "W", "A" through "F"
     <nprocs>         is number of processes

[...]
```

```
*****
* Custom build configuration is specified in config/make.def *
* Suggested tutorial exercise configuration for LiveDVD:      *
*      make bt-mz CLASS=W NPROCS=4                            *
*****
```

- Specify the benchmark configuration
  - benchmark name: **bt-mz**, lu-mz, sp-mz
  - the number of MPI processes: **NPROCS=4**
  - the benchmark class (S, W, A, B, C, D, E): **CLASS=W**

```
% make bt-mz CLASS=W NPROCS=4
cd BT-MZ; make CLASS=W NPROCS=4 VERSION=
make: Entering directory 'BT-MZ'
cd ../sys; cc -o setparams setparams.c
../sys/setparams bt-mz 4 W
mpif77 -c -O3 -fopenmp bt.f
[... ]
cd ../common; mpif77 -c -O3 -fopenmp timers.f
mpif77 -O3 -fopenmp -o ../bin/bt-mz_W.4 \
bt.o initialize.o exact_solution.o exact_rhs.o set_constants.o \
adi.o rhs.o zone_setup.o x_solve.o y_solve.o exch_qbc.o \
solve_subs.o z_solve.o add.o error.o verify.o mpi_setup.o \
../common/print_results.o ../common/timers.o
Built executable ../bin/bt-mz_W.4
make: Leaving directory 'BT-MZ'
```

- What does it do?
  - Solves a discretized version of unsteady, compressible Navier-Stokes equations in three spatial dimensions
  - Performs 200 time-steps on a regular 3-dimensional grid
- Implemented in 20 or so Fortran77 source modules
- Uses MPI & OpenMP in combination
  - 4 processes with 4 threads each should be reasonable
    - don't expect to see speed-up when run on a laptop!
  - bt-mz\_W.4 should run in around 5 to 12 seconds
  - bt-mz\_A.4 should take around 10-15x longer (50-100 seconds)

- Launch as a hybrid MPI+OpenMP application

```
% cd bin
% OMP_NUM_THREADS=4 mpiexec -np 4 ./bt-mz_W.4
NAS Parallel Benchmarks (NPB3.3-MZ-MPI) - BT-MZ MPI+OpenMP Benchmark
Number of zones:   4 x   4
Iterations:   200   dt:   0.000800
Number of active processes:       4
Total number of threads:       16  (  4.0 threads/process)

Time step   1
Time step  20
Time step  40
  [...]
Time step 160
Time step 180
Time step 200
Verification Successful

BT-MZ Benchmark Completed.
Time in seconds = 5.57
```

Hint: save the benchmark output (or note the run time) to be able to refer to it later

- The tutorial steps are similar and repeated for each tool
- Edit `config/make.def` to adjust build configuration
  - Modify specification of compiler/linker: `MPIF77`
- Make clean and build new tool-specific executable

```
% make clean
% make bt-mz CLASS=W NPROCS=4
Built executable ../bin.$(TOOL)/bt-mz_W.4
```

- Change to the directory containing the new executable before running it with the desired tool configuration

```
% cd bin.$(TOOL)
% export ...
% OMP_NUM_THREADS=4 mpiexec -np 4 ./bt-mz_W.4
```

```
#          SITE- AND/OR PLATFORM-SPECIFIC DEFINITIONS
#-----
# Items in this file may need to be changed for each platform.
#-----
...
#-----
# The Fortran compiler used for MPI programs
#-----
MPIF77 = mpif77

# Alternative variants to perform instrumentation
#MPIF77 = psc_instrument -u user,mpi,omp -s ${PROGRAM}.sir mpif77
#MPIF77 = tau_f90.sh
#MPIF77 = scalasca -instrument mpif77
#MPIF77 = vtf77 -vt:hyb -vt:f77 mpif77
#MPIF77 = scorep --user mpif77

# PREP is a generic preposition macro for instrumentation preparation
#MPIF77 = $(PREP) mpif77

# This links MPI Fortran programs; usually the same as ${MPIF77}
FLINK    = $(MPIF77)
...

```

Default (no instrumentation)

Hint: uncomment one of these alternative compiler wrappers to perform instrumentation
